

Naol Ayele

Software Engineer & Full Stack Developer | Python, JavaScript/
TypeScript, Java | Backend Systems, System Design & Architecture

+251-988662556 naolaye85@gmail.com [LinkedIn](#) Ethiopia [naol-ayele](#)

PROFILE

Full Stack Developer with 2+ years of professional experience building scalable web and mobile applications. Specialized in backend architecture, system design, and production deployment. Proven ability to design and implement secure, high-performance systems handling complex business logic. Strong problem-solver with deep understanding of distributed systems, database optimization, and DevOps best practices.

EDUCATION

Adama Science and
Technology University
2022-2026

Bachelor of science in Software Engineering

Relevant Coursework: Python, C++, Java, Advanced Programming, Data Structures and Algorithms, Machine Learning, Computer Vision, Natural Language Processing, Operating Systems, Computer Security, System Architecture, Component-Based Software Development, Cybersecurity

PROFESSIONAL EXPERIENCE

Backend Developer – Cooperative Bank of Oromia 01/2025 – 08/2025

- Engineered and deployed secure banking applications using Spring Boot monolithic architecture, achieving 99.95% system uptime and processing 10,000+ daily transactions
- Spearheaded development of JWT-based authentication and 5-tier Role-Based Access Control system, reducing unauthorized access attempts by 30% Implemented transaction management with database-level locking, preventing race conditions in concurrent financial operations
- Resolved average of 5 critical bugs per sprint through systematic debugging and testing.
- Designed PostgreSQL database schema with proper indexing for sub-100ms response times .

Backend Developer – Ethronics (IRAS) 07/2024 – 12/2024

- Built and maintained RESTful APIs for healthcare scheduling platforms using Node.js and Express.js
- Designed database schemas and implemented complex business logic for appointment management and patient notifications
- Performed database optimization, version control management, and production debugging
- Collaborated with frontend team to integrate backend services, improving system reliability

Project

TECHNICAL SKILLS

- **Languages:** Java (Core), JavaScript (ES6+), TypeScript, Python, Dart
- **Backend Frameworks:** Spring Boot, Node.js, Express.js, Hibernate, Prisma ORM, FastAPI, WebSocket
- **Databases:** PostgreSQL, MongoDB, Redis, SQLite
- **AI/ML Skills:** SWE-Bench Task Creation, Code Evaluation, AI Model Assessment, Algorithm Analysis, Prompt Engineering, System Design Review, Code Quality Analysis, Test Writing, Codebase Navigation
- **Tools & Infrastructure:** Docker, Docker Compose, Linux/Unix, Bash scripting, Git, GitHub, GitHub Actions, Maven, VS Code, Postman, CI/CD pipeline design, system monitoring, containerized development workflows
- **Testing & Quality:** Jest, Supertest, Unit Testing, Code Review, TDD/BDD, Static Analysis
- **Core Competencies:** RESTful API Design, CI/CD (GitHub Actions), Monolithic Architecture, RBAC, Multi-file Architecture, Data Structures, System Security, Production Debugging, Codebase Analysis, Code Review, Logical Error Detection, Performance Optimization, Task Specification Design

PROFESSIONAL SKILLS
